

**SYLLABUS / FIȘA DISCIPLINEI**
**1. Information on the study programme / Date despre programul de studii**

1.1. Institution / Instituția de învățământ superior	Universitatea de Vest din Timișoara
1.2. Faculty / Facultatea	Matematică și Informatică
1.3. Department / Departamentul	Computer Science (Informatică)
1.4. Study program field	Computer Science (Informatică)
1.5. Study cycle/ Ciclul de studii	Bachelor / licență
1.6. Study programme / Programul de studii / calificarea*	Computer Science : <i>Database administration / Administrator baze de date - 252101; Computer network administration / Administrator de rețea de calculatoare - 252301; Analyst / Analist - 251201; Research assistant in computer science / Asistent de cercetare în informatică - 214918; Teacher in secondary schools / Profesor în învățământul gimnazial - 233002; Programmer / Programator - 251202; Software systems designers / Proiectant sisteme informatice - 251101</i>

**2. Information on the course / Date despre disciplină**

2.1. Title of the course / Denumirea disciplinei		Security and Criptography					
2.2. Teacher in charge of the course / Titularul activităților de curs		Stelian Mihalas					
2.3. Teacher in charge of the seminar / Titularul activităților de seminar		Stelian Mihalas					
2.4. Study year / Anul de studii	3	2.5. Semester / Semestrul	2	2.6. Examination type / Tipul de evaluare: E(xam)/C(olloquim)	C	2.7. Course type / Regimul disciplinei: M(andatory)/ E(lective)/ F(acultative)	DO

**3. Estimated study time (number of hours per semester) /Timpul total estimat (ore pe semestru al activităților didactice)**

3.1. Attendance hours per week / Număr de ore pe săptămână	4	out of which din care: 3.2 lecture/ curs	2	3.3. seminar/laborator	2
3.4. Attendance hours per semester / Total ore din planul de învățământ	56	out of which: 3.5 lecture / curs	28	3.6. seminar/laborator	28
<b>Distribution of the allocated amount of time / Distribuția fondului de timp*</b>					<b>hours/ ore</b>
Individual study /Studiu după manual, suport de curs, bibliografie și notițe					14
Supplementary documentation at library or using electronic repositories / Documentare suplimentară în bibliotecă, pe platformele electronice de specialitate					7
Preparing for laboratories, homework, reports etc. /Pregătire seminarii/laboratoare, teme, referate, portofolii și eseuri					14
Exams / Examinări					7
Tutoring / Tutorat					14

3.7. Total number of hours of individual study / Total ore studiu individual	56
3.8. Total number of hours per semester / Total ore pe semestru	112
3.9. Number of credits (ECTS) / Număr de credite	5

#### 4. Prerequisites (if it is the case) / Precondiții (acolo unde e cazul)

4.1. curriculum / de curriculum	Programming I, III
4.2. skills / de competențe	

#### 5. Requirements (if it is the case) / Condiții (acolo unde e cazul)

5.1. for the lecture / de desfășurare a cursului	Internet connection, Google Classroom code: 7tg3qgk Meet link: <a href="https://meet.google.com/lookup/dkaanvupb7">https://meet.google.com/lookup/dkaanvupb7</a>
5.2. for the seminar, laboratory / de desfășurare a seminarului/laboratorului	C development environment installed on the workstations, internet connection

#### 6. Acquired skills / Competențe specifice acumulate

Professional skills / Competențe profesionale	<ul style="list-style-type: none"> <li>• Understanding the mathematical foundations of cryptography and cryptanalysis</li> <li>• The knowledge and the capacity of applying information encryption and decryption methods</li> <li>• Basic understanding of statistical methods used in cryptanalysis</li> <li>• Ability of applying hash functions to guarantee the integrity of a file or of a message</li> <li>• Ability to use digital certificates in the authentication process and in secure communication</li> <li>• Recognizing the importance of data backup, protection and integrity preservation</li> <li>• Skills in identifying, preventing and blocking internet specific threats – viruses, trojans, phishing, spoofing</li> </ul>
Transversal skills / Competențe transversale	<ul style="list-style-type: none"> <li>• Ability to use the Visual Studio IDE for application development</li> <li>• Realizing the importance of personal data protection in general</li> <li>• Understanding the necessity of secure communication in day to day life</li> <li>• Recognizing the general internet threats and implementing measures to prevent them</li> </ul>

#### 7. Objectives of the course / Obiectivele disciplinei (reieșind din grila competențelor specifice acumulate)

7.1. General objective / Obiectivul general al disciplinei	Getting to know and use cryptographic and security concepts – hash functions, key exchange protocols, encryption and decryption algorithms, digital signatures, public key certificates and infrastructure, data protection principles, secure communication, internet threats prevention.
7.2. Specific objectives / Obiectivele specifice	<i>Knowledge objectives (KO):</i> (1) Good understanding of the mathematical foundations of cryptography; (2) Knowing the main encryption and

	<p>decryption algorithms and the key exchange protocols (3) Understanding the nature of security threats</p> <p><i>Ability objectives (AO):</i> (1) Ability to implement secure communication (2) Ability to recognize and prevent threats</p> <p><i>Skills wise objectives (SO):</i> (1) Implementation of basic data protection, backup and restoration; (2) Ability to use antivirus and other threat prevention and removal software</p>
--	--

## 8. Content / Conținuturi\*

8.1. Lecture / Curs	Teaching strategies / Metode de predare	Remarks, details / Observații
01 - Cryptography and cryptanalysis	Lecture, class discussion, informal debate	
02 - Classical cryptography, Diffie-Hellman algorithm	Lecture, class discussion, student presentation, questioning	
03 - Hash functions - MD5, SHA-1, SHA-4	Student presentations, questioning, informal discussion	
04 - DES, AES, specifications and algorithms	Student presentations, questioning, informal discussion	
05 - Elements of number theory, the RSA algorithm	Lecture on number theory, Student presentation, questioning, informal discussion	
06 - DSS, specification and implementation	Student presentations, questioning, informal discussion	
07 - The SSL protocol, Secure Shell	Student presentations, questioning, informal discussion	
08 - Data security, Network security	Student presentations, questioning, informal discussion	
09 - Traffic analyzers, Passwords	Student presentations, questioning, informal discussion	
10 - Torrents, the hide and seek game	Student presentations, questioning, informal discussion	
11 - Viruses, examples, protection	Student presentations, questioning, informal discussion	
12 - Trojans, examples, protection	Student presentations, questioning, informal discussion	
13 - Software exploits, Internet threats	Student presentations, questioning, informal discussion	
14 – Security Proxies	Lecturer presentation, justification, critical discussion

<b>8.2. Seminar, lab / Seminar, laborator</b>	<b>Teaching/learning strategies / Metode de predare/ învățare</b>	<b>Remarks, details / Observații</b>
1 - Projects setup and specification, bit level operations	Lecture, conversation, exemplification, case studies, demos, code skeletons	
2 - SHA-1 algorithm details, functions		
3 - Project SHA-1 submitted		
4 - AES, the Rijndael algorithm, algebraic operations		
5 - Functions used in the Rijndael algorithm, encryption phase		
6 - Inverse functions, decryption phase		
7 - Implementation and FIPS 197 test cases validation		
8 - Project AES (Rijndael) submitted		
9 - Digital certificates structure and tools to generate them		
10 - Key generation details and key stores tools		
11 - Digital Signature Algorithm specification, algorithms involved		
12 - The Java security packet		
13 - Java based DSA implementation		
14 - Project DSA submitted

**9. Correlations between the content of the course and the requirements of the IT field / Coroborarea conținuturilor disciplinei cu așteptările reprezentanților comunității epistemice, asociațiilor profesionale și angajatorilor reprezentativi din domeniul aferent programului**

Course content is typical for teaching Security and Cryptography in colleges at undergraduate level. Ubiquity of security issues and data protection concerns make skilled professionals in this area in high demand.

**10. Evaluation / Evaluare\***

Activity / Tip de	10.1. Evaluation criteria / Criterii	10.2. Evaluation methods /	10.3. Weight in
-------------------	--------------------------------------	----------------------------	-----------------

activitate	de evaluare**	Metode de evaluare***	the final mark / Pondere din nota finală
10.4. Lecture / Curs	Knowledge levels in all course areas, quality of course presentations	Colloquium in written form or course presentation	50%
10.5. Seminar/ lab	Proper SHA-1 implementation, knowledge	Project execution, questioning	15%
	Proper AES implementation, knowledge	Project execution, questioning	20%
	Proper DSA implementation, knowledge	Project execution, questioning	15%
10.6. Minimal knowledge for passing / Standard minim de performanță			
Acquiring a passing grade as a combination of the colloquium/presentation and lab projects.			

Date/ Data completării

Signature (lecture) /  
Semnătura titularului de curs

Signature (seminar)  
Semnătura titularului de seminar

Signature (director of the department)
